Matlab Script Publishing Instructions

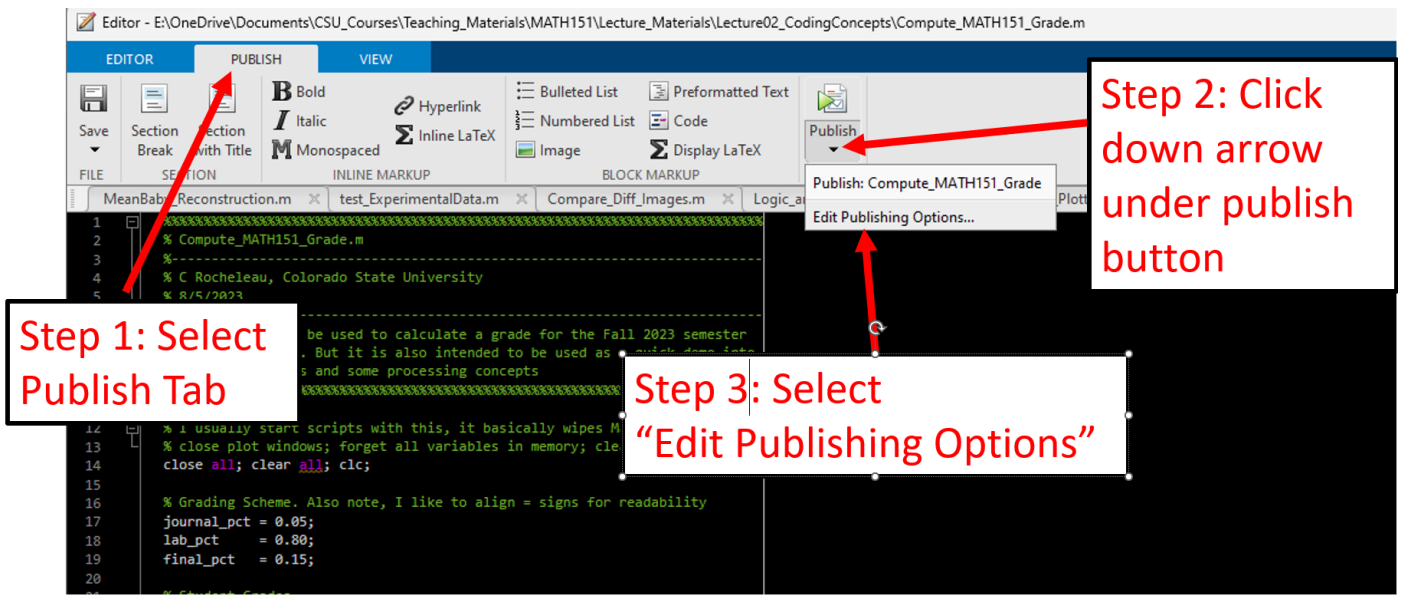

MATH-151: Mathematical Algorithms in Matlab

Month XX, 2023

Access Publish Tab

- I would like to receive lab submissions as a PDF published by Matlab.
- To publish a script, with our script open we select the "Publish" tab on the Editor Window, click the down under arrow under the publish button, then select "Edit Publishing Options"

Publishing Options

- Matlab's default is to publish as a html file, we need to change that to pdf. You may change the folder the file is saved to or save your settings for your own convenience as well.
- Click Publish and let Matlab do its thing!
